

# BIRCH PLYWOOD PROCESSING

[www.troja.lv](http://www.troja.lv)

**ABOUT US**

| «Troja» SIA was founded in 1992 and currently is one of the leading plywood processing companies in Europe.

| We are a modern, innovative, development-oriented company and our key activity includes birch plywood processing on CNC machines and cutting-to-sizes in accordance with the highest quality standards.

| We produce rocking horses, office furniture, traffic road signs, acoustic and 3D panels, as well as other plywood products of higher added value, exported mainly to the countries of Western Europe.
