

# Riga Acoustic

## ABOUT

Acoustic panels have a wide range of indoor applications such as wall and ceiling panels, exhibition booth construction and separating wall elements. These panels are the best solution for applications where insulation, acoustic performance, durability and design are required.

Panels are ready for use, easily mounted and environmentally friendly.

Ready for use varnished acoustic panels:

**Size:** 1200 x 600 x 9mm

**Basic material:**  
Birch plywood Riga Decor

Acoustic panels reduce echo time in the room, thus reducing noise and giving clearer sound

To obtain the desired acoustic qualities, at least 30% of the room finishing must be made from sound absorbing materials

Consult acoustics specialists about the number of panels and where to place them in the room
